Econ 671b. Financial Economics II

**Course Type:** Graduate  
**Course term:** Spring  
**Year:** 2018

The sequence of courses Financial Economics I and II examines financial theory in detail. The first term covers single-period models and the second term examines multi-period models. Topics covered include arbitrage, portfolio theory, efficient markets, CAPM, APT, contingent claims pricing and the term structure of interest rates.

**Semester offered:** Spring
