Econ 421a. Designing the Digital Economy

Day / time: T 2:30 - 5:30 pm  
Course Type: Undergraduate  
Course term: Fall  
Year: 2017  

Digitization is transforming a variety of markets from personal transportation services to advertising. This course explores the economic tools (market design, price theory, causal inference, etc.) and technical tools from computer science (machine learning, the analysis of algorithms, user interface design, etc.) students need to contribute meaningfully to this transformation.

Prerequisites: elementary training in both economics and computer science and some intermediate/advanced training in at least one relevant field.

[also ECON562/CPSC512/CPSC412]

Semester offered: Fall  
Visiting Instructor(s): Eric Weyl  
Undergrad Course Category: Industrial Organization
